

PROJECT GIGABIT: KEY WORKSTREAMS

COMMERCIAL ROLLOUT

- **Buoyant investor market** - many new entrants
- Government expects market delivery to reach up to **80% of UK premises**
- **Public sector facilitation role** to maximise the reach of this investment.
 - Wayleaves
 - MDU and social housing access
 - Street works
 - New builds

3. Gigabit Broadband Voucher Scheme

Home and businesses in rural locations which meet the following criteria can use vouchers to support the cost of installing new gigabit-capable connections when part of a group project.

- Existing broadband speeds are less than 100Mbps
- A gigabit capable network isn't likely to be built to that area commercially in the near future
- There is no government-funded contract planned or in place to improve the network already

Group projects are when two or more residents and/or eligible businesses get together to combine their vouchers towards the shared cost of installation. Single connections are *not* eligible for the scheme. Projects will also be subject to BDUK commercial and value for money assessments.

Your new connection speed must reach:

- At least double your existing speed if your current speed is less than 50Mbps
- At least 100Mbps if your current speed is more than 50Mbps
